**ONLINE DAY CARE MANEGMENT**  
**CLOUD CHILD CARE**

**Short Description:**

Today, many families with young children must make a choice between spending significant portion of their income on child care, finding a cheaper, but potentially lower- quality care option, or leaving the workforce altogether to become a full-time caregiver.

Whether due to high cost, limited availability, or inconvenient program hours, childcare challenges redriving parents out of the work. Infect, in2016 alone, an estimated 2 million parents made career sacrifices due to problems with child care.

Child care challenges have become a barrier to work, especially for mothers, who disproportionately take on unpaid caregiving responsibilities when their family cannot find or afford childcare. In Bangladesh, most parents have limited knowledge on child care and rearing Ourprojectobjectistosolvethchildcaresystemforworkingparents.The name of our application project is “**CLOUD CARE**”. so, our software will help you to take care of your baby with an educated moderator. So specifically, this created for childcare attendance tracking, accounting, and tuition payments,

CLOUDCAREManageraimstosimplifythemanagementoftheirchildcarecenters, preschools, and before/after school programs. Key features of CLOUD CARE Manager include a robust accounting and receivable management, a fully integrated card processing with Rapid Tuition, and an Employee Center that seamlessly track employee hours, certifications, and training. Management Software provides a host of features that include mobile app, a parent portal, child schedules, staffs. schedules, medical records, billing, and payments, among others. the target group fusers of our solution are the educated jobless people, working parents, and the main concern is our children to keep them safe.

**THANK YOU**
